DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on September 7, 2006 has been entered. Claims 1, 2, 15, 16, 21, and 24 have been amended. Claims 3-14, 17-20, 22 and 23 have been canceled. Claims 1, 2, 15, 16, 21, and 24 are still pending in this application, with claims 1, 2, 15, 16, 21 and 24 being independent.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1, 2, 15, 16, 21 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Fox (U.S. Patent No. 6,363,143).

Regarding claims 1, 15, 21 and 24, Fox teaches a communication network and a communication service information providing method comprising the steps of:

receiving a call (see Fig. 3A, 300), which is transmitted from a calling subscriber to a called subscriber that subscribes a plurality of communication services (telephone and Internet),

Art Unit: 2614

said call being used to select one of the plural communication services (it is noted that telephone call is one of plurality of communication services); and

providing information (user's present location, user is at home, etc.) related to another communication service subscribed to by the called subscriber with respect to the calling subscriber without connecting by the other communication service, the provided information being usable for selecting said another communication service when the selected communication is in a non-connectable state (column 6, lines 7-50).

Regarding claims 2 and 16, Fox teaches a communication network and a communication service information providing method comprising the steps of:

receiving a call (see Fig. 3, 300), which is transmitted from a calling subscriber to a called subscriber that subscribes a plurality of communication services (telephone and Internet), said call being used to select one of the plural communication services (it is noted that telephone call is one of plurality of communication services);

providing information (user's present location, user is at home, etc.) related to another communication service subscribed to by the called subscriber with respect to the calling subscriber, the provided information being usable for selecting said another communication service when the selected communication service is in a non-connectable state (column 6, lines 7-50); and

when the calling subscriber selects one of other communication services from the provided information, trying to connect to the called subscriber by way of the selected another communication service (column 6, lines 7-50).

Art Unit: 2614

Response to Arguments

4. Applicant's arguments with respect to claims 1, 2, 15, 16, 21, and 24 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benny Q. Tieu whose telephone number is 571-272-7490. The examiner can normally be reached on Monday-Friday: 6:30AM - 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wing Chan can be reached on 571-272-7493. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
